5-PROCEDURE:-

Energy Conservation practices adopted are :-

- Use of renewable energy – solar power plant.
- Replacement of all tube lights with LED tubes and LED bulb being most efficient lighting options.
- Annual energy audit is performed.
- Raising Awareness on energy conservation - energy conservation practices and Eco-friendly habits are inculcated among students and staff through cautioning them about simple precautions which are effective to reduce electricity. These practices includes -
- Turning off all lights, appliances and electronics not in use.
- Activate power management on computers and monitor so that it will go in a low power slice mode when students and staff is not working on it.
- Whenever possible shall down rather than logging off.
- Turn off unnecessary lights and use day lights instead.
- Keep lights off in conference halls classrooms seminar hall when they are not I use.
- Use fans only when they are needed.
- Unplug appliances when they are not in use.
- Avoid lights in well illuminated corridors.
- Avoid use of decorative lights.
