Course Name	Problem solving computer skills
Course Code	INC/VAC/19/01
Duration	16 Hrs.

About Course

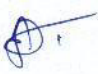

Nurses must demonstrate effective computer skills as emphasized by numerous professional healthcare organizations. Having good computer skills is essential to collaborate with fellow us, problem solving is the process of identifying a problem, developing an algorithm for the identified problem and finally implementing the algorithm to develop a computer program.

Course Objectives

After completion of the course students will be able to Computers enable nurses to quickly access important information about information Identify a computer program. Computer programming language, Algorithm. List the computer problem solving phases., computer programming languages, flow chart, List types of flow charts, Identify symbol in flow chart, Draw a flow chart to add numbers, Draw a flow chart to add area, Problem solving computer skills Certification.

Course Content

Module 1	Identify a computer program.
Module 2	Define a computer programming language.
Module 3	Define Algorithm.
Module 4	List the computer problem solving phases.
Module 5	Give examples of computer programming languages.
Module 6	Define flow chart.
Module 7	List types of flow charts
Module 8	Identify symbol in flow chart
Module 9	Draw a flow chart to add numbers
Module 10	Draw a flow chart to add area
Module 11	Problem solving computer skills Certification

VALUE ADDED COURSE

Course Name	Disaster management in wildfires
Course Code	INC/VAC/18/02
Duration	16 Hrs.

About Course

The process for wild fire disaster management combines preparation, response, recovery, and mitigation. Nurses can be prepared to meet the challenges by education in disaster management and by participating in disaster drills to test the plan and nursing response. The objective of this workshop is aimed to improve the communication skills among student nurses.

Course Objectives

After completion of the course students will be able to Introduction of disaster management, Rescue during wild fire disaster, Relocation wild fire Disaster management plans, Wild fire disaster management plans, Role of a nurse in disaster preparedness , Rehabilitation by health sector and multidisciplinary team, Provision Food and Water, Provision Emergency Health Care, Prevention of Disease and Disability, Role of the nurse in emotional first aid

Course Content

Module 1	Introduction of disaster management.
Module 2	Rescue during disaster wild fire
Module 3	Relocation wild fire Disaster management plans
Module 4	Wild fire disaster management plans
Module 5	Role of a nurse in disaster preparedness
Module 6	Rehabilitation by health sector and multidisciplinary team
Module 7	Provision Food and Water
Module 8	Provision Emergency Health Care

VALUE ADDED COURSES

Course Name	Gerontic Nursing
Course Code	INC/VAC/19/07
Duration	16Hrs.

About the Course:

The course addresses the outcome criterion of critical thinking through continued development of advanced knowledge and skills necessary to assess, plan, and manage commonly occurring acute and chronic cognitive and emotional changes that occur with normal aging and disease. Additionally, skills in selecting and developing appropriate advanced therapeutic nursing interventions are enhanced by examinations, case study analyses, and discussion of topics. The outcome criterion of communication is addressed through online discussion and analyses of case studies.

Course Objectives:

Upon completion of this course, the student will be able to analyze the interface among normal aging, bio- psychosocial problems, and selected mental illness in older adults apply critical thinking skills necessary to assess, diagnose, and treat the older adult with selected mental illness Plan care for the older adult with a cognitive or mental disorder using pertinent research findings, theory-based interventions, and recommendations from guidelines examine selected mental health problems and their legal implications in older adults recognize and examine intervention strategies with individuals experiencing caregiver stress.

Course Content:

Module 1: Aging and Mental Health Issues Assessment/Classification of Disorders

Module 2: Psychosis

Module 3: Interventions/Psychopharmacology

Module 4: Depression Anxiety

Module 5: Disorders Issues in Long-Term Care (LTC facilities/caregivers)

Module 6: Crisis

Module 7: Elder Abuse (Pam Tabor) Student

Module 8: Presentations/Group Leadership

Module 9: PTSD

Module 10: Substance abuse and alcoholism, Personality disorders

VALUE ADDED COURSES

Course Name	Sexual Harassment
Course Code	INC/VAC/17/09
Duration	16Hrs.

About the Course:

Sexual harassment prevention training is important because of the negative impact that sexual harassment can have on both employer and employee in the workplace. In addition to the time and expense of a potential human rights complaint, discrimination and harassment can impact the workplace in a negative manner by causing; lower employee morale, increased absenteeism, lower productivity, decreased commitment to the Employer, and decreased motivation.

Course Objectives:

Students will be able to: -

- Define sexual harassment in the workplace.
- Respond effectively to sexual harassment (recognizing and reporting incidents).
- Design and implement policies and procedures to identify and prevent sexual harassment.
- Assess problem situations and preventing sexual harassment.
- Summarize the law and sexual harassment, both on state and federal levels.
- Demonstrate mastery of lesson content at levels of 70% or higher.

Course Content:

Module 1: What is sexual harassment?

Module 2: Vanshika guidelines

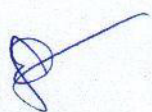

Module 3: SHWWP (PPR) Act, 2013

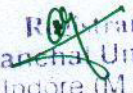

Module 4: Redressal

Module 5: SHWWP (PPR) Act, 2013 in the light of service and conduct rules

Module 6: Global norms & practice

Module 7: Medha KotwalLele case implication
