VALUE ADDED COURSE

TOPIC: ADVANCE WEB
MANAGEMENT

SCHEDULE

Contact person: Event coordinators

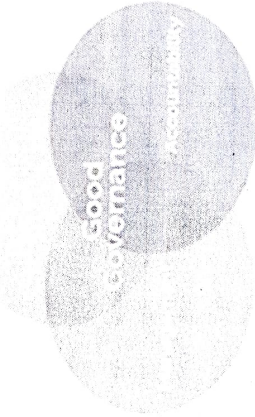

Resource person: Dr. Javed Khan Pathan

Date: 05/06/2023-08/06/2023

Venue: Room no. 02 (IIP)

CONCEPT

The course is designed to provide participants with a comprehensive understanding of governance principles, ethical leadership, transparency, and accountability in organizational and societal contexts.

LEARNING OBJECTIVES

This course aims to develop participants' understanding of transparency, accountability, and ethical leadership while equipping them with practical skills for fostering inclusivity and sustainable development in governance processes.

MODULE

- Introduction is
- Ethical Leadership and Decision Making
- Inclusivity and Equity in Governance
- Governance and Sustainable Development
- Global Perspectives on Good Governance

LEARNING

- Enhanced understanding of principles and their applications.
- Improved decision-making and ethical leadership abilities.
- Ability to implement transparency and accountability practices in organizations.
- Increased awareness of governance's impact on sustainable development and public trust.
- Stronger commitment to promoting inclusivity

REPORT ON "ADVANCE WEB MANAGEMENT" A
TECHNOLOGICAL SKILL

Date- 12/06/2023

A Value Added Course on "Advance Web Management A Technological Skill" were conducted between 05/06/2023 to 08/06/2023 at Lecture hall no. 1 of Index Medical College, Hospital & Research Centre, Indore.

The course was for the students of Pharmacy to know about Advance Web Management.

The programmed was scheduled for 16 Hrs .

The total students participated on workshop was 70.

The Topics for the meeting were as follows:

1. Fundamentals of Java Script
2. Introduction to JavaScript Objects
3. Exploring JavaScript Selectors

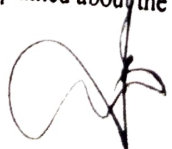

Day first started with introduction on the Advance Web Management. The resource person was Dr. AJAY JOSHI, He discussed on Fundamentals of Java Script, which as follows :-

- 7 JavaScript Fundamentals Every Web Developer Should Know.
- Functions Are Independent Units of Behavior.
- Objects Are Dynamic Collections of Props.
- Objects Inherit From Other Objects.
- Functions Are Values.
- Functions Can Become Closures.
- Primitives Are Treated as Objects.
- JavaScript Is a Single-Threaded Language.

Objective of java Script: To understand the basics of working with objects in JavaScript: creating objects, accessing and modifying object properties, and using constructors.

Second day the session was lead by Mr. Amit Jain, in his session he explained about the introduction to java script objects. Which was completed in 4 hours.

In JavaScript, an object is an unordered collection of key-value pairs. Each key-value pair is called a property. The key of a property can be a string. And the value of a property can be any value, e.g., a string, a number, an array, and even a function.

Third day the session was lead by Dr. AJAY THAKUR, about exploring Java script Selectors.

There are many basic different types of selectors.

- Element Selector.
- Id Selector.
- Class Selector.
- Universal Selector.
- Group Selector.

DOM Selectors, as the name suggests is used to select HTML elements within a document using JavaScript. There are 5 ways in which you can select elements in a DOM using selectors.

Selectors are used to "find" (select) HTML elements based on their tag name, id, classes, types, attributes, values of attributes and much more.

The element selector is a way to select all the elements with a given tag name in a document, and apply the same styles to each element with the tag name. Note that you should only write the tag name, and not write brackets around the tag name — h1, not <h1>.

Class selector selects elements with a specific class attribute. To select elements with a specific class, write a period (.) character, followed by the name of the class. You can also specify that only specific HTML elements should be affected by a class

Universal Selector :

It matches a single element. An asterisk (i.e. "*") is used to denote a CSS universal selector. An asterisk can also be followed by a selector. This is useful when you want to set a style for all the elements of an HTML page or for all of the elements within an element of an HTML page.

On last day the participants were given a few worksheets on these areas and their performance was evaluated.
