**Report: QUALITY CONTROL & ASSURANCE IN HOSPITAL**

A value added course on 'QUALITY CONTROL & ASSURANCE IN HOSPITAL has been scheduled on 24 JUNE to 26 JUNE , in the LT-3 of INDEX Hospital Indore.

This course was conducted for 18 hours, where each session was conducted for 6 hours. The total number of participants attending the course was 86.

The course was conducted for Final year medical students to learn and prepare themselves to effectively collaborate with colleagues with different experience levels or opinions and get to learn about quality control and assurance in health care.

The speakers of the course were Dr. Mubarik Sayyed, Assistant Professor, Department of General Surgery and Dr. Rahul Jain, Assistant Professor, Department of General Surgery, Dr Sanjay Patidar, Professor, Department of General Surgery.

The course was conducted for three sessions; each session was conducted for six hours.

The modules for this course were as follow:

- What do you mean by quality control in health care?
- What is assurance in health care?
- What is the impact of quality control and assurance in remote hospitals?
- Developments in quality assurance.
- What is patient safety knowledge?

Quality control and quality assurance is the most important aspect in the health care. Thus, it becomes important for health care professionals to learn and know about this in a effective manner.

The various components of quality care were discussed like safe, efficient, effective, equitable, economic, patient centered and timely interventions. The safety is the foundation upon which all other aspects of quality care are built.

End users of health care services patient and family members as well as health care providers and its professionals. Hence responsibilities should be fixed.

*Soalkar*  
Registrar  
Malwanchal Universit,  
Indore (M.P.)

Quality assurance is that set of activities that are carried out to previously set standards to monitor and improve performance so that the care provided is as effective and as safe as possible.

It was explained that

- The components of quality management that ensures the right things are being done based on standards and established goals
- What are the systemic process of checking if a health care service is meeting specific requirements.
- How to reduce waste and unnecessary activities and improve service delivery.

Focused discussion was done on systemic performance like health priorities, system planning, financing and resource allocation done at national level and global level.

General environment of the country, legislation, and other regulatory mechanisms, professional recognitions and overall quality management.

Institutional and clinical performance were considered including external assessment like accreditation, licensing, peer review and internal assessment like patient's right, risk management, clinical governance, clinical audit, performance indicators and bench marking.

At the end of this course, the participants learned about:

- Quality control in health care.
- Assurance in health care.
- Impact of poor quality control and assurance in health care.
- Remote health care services.
- Financial considerations.
